EDUCATION

University of California, Berkeley - College of Engineering

Berkeley, CA | May 2029

B.S. Mechanical Engineering

GPA: 3.52

WORK EXPERIENCE

Enhanced Radar (YC W25) - Hardware Engineer

San Francisco, CA | Feb. 2026 - May 2026

Hardware execution for operational SDR receiver platforms, overseeing system readiness, iterative improvement, and deployment

- Manufactured and deployed of \$100K+ worth of SDR based radar receiver systems across 80+ major U.S. airports
- Designed aluminum, sheet metal mounts for hardware components to optimize box fit and air flow, decreasing temp by 10°C
- Reduced receiver enclosure weight 29% (28→20 lbs) through iterative mechanical redesign, improving ease of deployment
- Iterated on hardware designs and choices across 6 hardware revisions based on field data reducing field failure rate by 65%
- Configured, tested, and verified 30+ receiver units achieving >90% uptime across 4 months of continuous field operation

ELDAEON - Mechanical Engineering Intern

Berkeley, CA | Jan. 2026 - Apr. 2026

End-to-end mechanical development of the Nemsis radar hardware, balancing form factor constraints, and manufacturability

- Designed a compact electromechanical housing, reducing volume by 30% while maintaining structural and thermal stability
- Rapid prototyped 10+ housing and 3d printed mount concepts, considering reliability for continuous outdoor exposure
- Designed a servo-driven rotational antenna and electronics mount to enable 360° radar coverage for aerial target detection
- Conducted design reviews of new and existing structures, minimizing cost by 20% while maintaining design effectiveness
- Communicated design and manufacturing risks and test results to leadership concisely

United States Navy Reserve - Naval Aircrewman Mechanical (E-5)

Point Mugu, CA | Jul. 2024 - Present

Logistical flights and inflight mechanical system operations on a \$65M C-130T in support of Carrier Strike Groups and NSW

- Executed pre-flight inspections and in-flight monitoring of mechanical systems having a 90% readiness over 166 flight hours
- Verified critical weight and balance data to ensure 100% compliance with strict safety protocols and technical directives
- Served as Second Loadmaster, overseeing aircraft systems and cargo compartment configuration across 25+ operations
- Ensured the secure transport of 200 tons of high-value equipment and transfer of 10k lbs of fuel during aerial refueling
- Maintained and troubleshooted three 3,000 PSI hydraulic systems, flight control surfaces, and loading evolutions

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

UAV@Berkeley - Airframes Subteam

Berkeley, CA | Sep. 2025 - Dec. 2025

Conceptualized and designed airframes, payload mounts, and leg supports for efficient drone performance and effectiveness

- Researched and coordinated with members to design a tail-sitting VTOL drone to meet competition requirements
- Designed and tested a small glider, applying principles of aerodynamics, structural analysis, and flight control surfaces

Sigma Chi Fraternity - Risk & Rush Chairman

Berkeley, CA | Sep. 2025 - Present

Directed chapter growth and safety compliance, increasing membership while managing event budgets and enforcing risk mitigation

- Developed and upheld risk mitigation protocols for a 48 person organization, overseeing crisis management and event safety
- Coordinated a high volume recruitment strategy and \$5000 budget to drive membership growth with compliance to Nationals

Little Libraries Project - Event Coordinator

Fountain Valley, CA | Aug. 2022 - Jun 2024

Developed and manufactured 3 libraries, each with 200 books each for underprivileged educational programs

- Utilized repurposed materials, power tools, and basic construction techniques to design and build durable, communal libraries
- Initiated a long-term, sustainable impact project that continues to serve children and educational organizations

ADDITIONAL INFORMATION

Relevant Skills: CAD, Manufacturing for Design, Product Reliability, GD&T, DFM/DFA, Failure Analysis and Risk Mitigation, Python, MATLAB

Activities and Societies: Sigma Chi, Cal Alumni Association Scholar, AAA Social Committee

Interest: Rock Climbing, Aviation, Traveling, Hiking, Gym, Brazilian Jiu-Jitsu
